Summary

I am Khushi Akter Hena, a passionate Web Developer based in Dhaka, Bangladesh, committed to crafting responsive and user-friendly web applications. Proficient in HTML5, CSS3, JavaScript, React.js, Node.js, and MongoDB, I transform ideas into functional and visually appealing digital solutions. My goal is to deliver high-quality projects that align with user needs and contribute meaningfully to the tech industry by blending creativity and storytelling in web design.

Skills and Technologies

Languages: JavaScript, HTML5, CSS3
Frameworks & Libraries: React.js, Express.js, Node.js, Material-UI, Tailwind CSS
Database: MongoDB
Authentication: Firebase
Other Tools & Platforms: Git, Figma, Canva
Soft Skills: Active listening, Quick learning, Teamwork, Problem-solving

Projects

Earnly   Live Demo | GitHub Repo

Earnly is a micro-task platform where users earn and withdraw real money.

- **Efficient Management & Security:** Includes an admin panel for monitoring users, tasks, and payments, with a leaderboard showcasing top workers. Implements JWT authentication and role-based access control for security.
- **Task-Based Earning System:** A micro-task platform where buyers create tasks, and workers complete them to earn money. Features secure payment integration (Stripe) and a withdrawal system.
- **Modern & Scalable Technology:** Built with React, Tailwind CSS, Node.js, Express.js, and MongoDB, ensuring a responsive user interface and robust backend for seamless performance.
- **User-Centric Experience:** Provides a responsive dashboard tailored for each user role, ensuring seamless task management and a smooth earning process across all devices.

Serview   Live Demo | GitHub Repo

A Service Review Platform for discovering, rating, and sharing trusted reviews.

- **Comprehensive & Interactive:** A platform for exploring, reviewing, and sharing feedback on services, with features like service management, user reviews, and search functionality.
- **Secure & Personalized:** Implements Firebase authentication, JWT-protected routes, and a user-friendly dashboard for logged-in users.
- **Modern & Responsive:** Built with React.js, Tailwind CSS, Node.js, Express.js, and MongoDB, featuring real-time counters (React CountUp) and smooth animations (Framer Motion)

MovieZone   Live Demo | GitHub Repo

MovieZone is your platform for browsing, rating, and managing movies with an interactive interface.

- **Comprehensive & Engaging:** Features an extensive movie database with the latest releases, authentic user reviews, ratings, and personalized recommendations.
- **Modern & Interactive UI:** Features authentic reviews, ratings, and recommendations tailored to user preferences.
- **Secure & High-Performance:** Ensures data consistency, security, and seamless accessibility across all devices for a reliable user experience.

Education

Bachelor of Science (B.Sc. Pass) (2023-Present)
National University of Bangladesh, Dhaka, Bangladesh.

Language

Bangla (Native), English (Proficient), Hindi (Speaking only)
